

# VITREA

Switch to Elegance

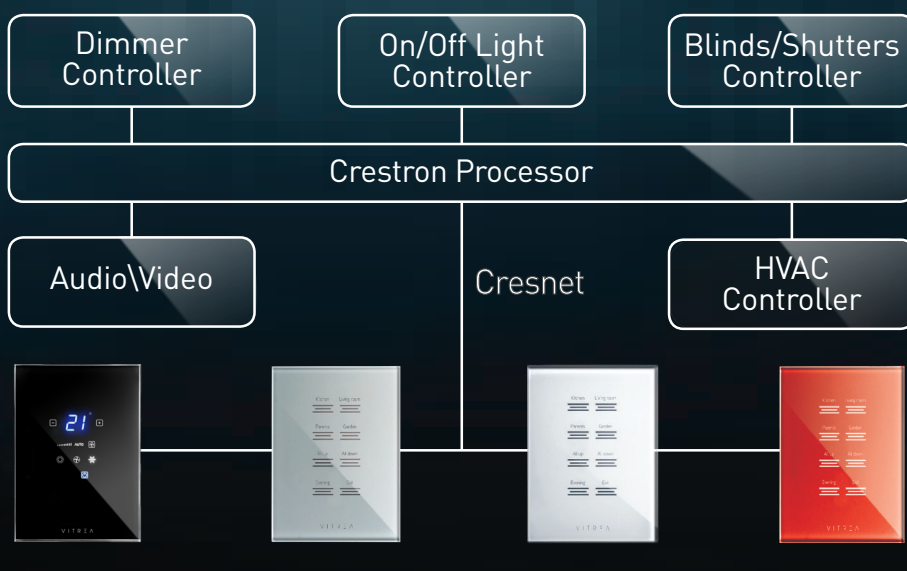

## Experience Elegance the Vitrea Way

Welcome to the exclusive VTouch Cresnet experience. These new keypads launched by Vitrea are now Crestron Connected® devices, which feature a chic and modern design for Crestron's smart home systems. The 2-way communication network between Crestron and our elegant glass keypads offers the following integration possibilities:

- LED light identification: Crestron's system can fully control the variety of options on each touch button.
- Communicate and customize: configure how and which commands are set for each touch button: press / release / short press / long press / double press.

### VTouch Cresnet Features:

Variety of elegant glass colors • Standard or matte finish • Customized glass panels for each home or office setting • Locate keypad in the dark with surrounding blue LED light • Full control of surrounding light's intensity • Standard or flush mount installation • Single & double gang • Available with 1 to 16 keys • Matching glass touch thermostats • Complete interior design with matching glass frames for sockets

Integration of VTouch Cresnet Keypads with Crestron
